## MN3915 Responsible Business in Context

*Hello, and welcome to Responsible Business in Context, 2020. We've designed this course to equip you with hands-on, applied knowledge about the ways in which the different functions of business organisations intersect with the context in which business operates, and the ways in which this affects business decisions. Our aim is to see you graduate next summer with practical insights about how to manage businesses more responsibly. Enjoy!*

---

### LEARNING OUTCOMES:

---

By the end of this course, you should be able to:

- Critically analyse business and management activities.
- Explain and discuss key megatrends that influence the firm's external context in the early 21<sup>st</sup> century.
- Explain and discuss how these trends represent both opportunities and constraints for business.
- Analyse the business context from the perspective of selected corporate functions.
- Analyse social, environmental or ethical challenges companies face and suggest appropriate courses of action.
- Analyse a firm's system/practices for addressing social, environmental and ethical issues.

---

### COURSE AIMS:

---

MN3915 is a core course in the final year BSc programme (Business & Management, Management with pathways, joint honours). The main focus is on the broader context within which organisations operate, with a particular focus on the contextual challenges and opportunities related to responsible business. Having gained an understanding of the workings of key corporate functions in prior courses, this course will increase your understanding of the opportunities and challenges that arise from the external business context. These are evaluated from the perspective of a range of corporate functions and appropriate corporate response structures are identified.

---

### FORMAT:

---

This module is ten weeks long and is organised into 5 theme blocks which each take place over two weeks. Within each week, we expect you to carry out 4-5 hours' worth of reading/listening/watching/commenting as well as attending:

1. 1x 'live' in person interactive lecture (sometimes called a 'flipped classroom' OR online version for non-campus based students)
2. 1x 'live' online MS teams workshop

*Check your timetable for details about the timing and location of these sessions.*

## MODULE CONTENT:

*Please note: For preparation, reading and activities you MUST visit each block on our MN3915 Moodle page.*

## ASSESSMENT

We have designed these assessments to do two things. First, check your understanding and knowledge about the ideas and concepts we have covered in the module. Second, to equip you with the following key skills: creativity (finding problems and solutions, innovating); critical thinking (analytical focused problem solving); commercial awareness (esp. horizon scanning); communication (presenting textually and visually for business audiences); digital (adapting to new technologies & using them in a business setting); leadership (motivating others, coordinating) and

teamwork (adopting a range of roles and working styles; collaborating). All these skills look excellent on your CVs!

**Formative Assessment (a.k.a. how we check your learning as the module progresses):**

Seminar discussion and debates will be used to provide formative assessment.

**Summative Assessment (a.k.a. what you get graded on):**

- 30% Group infographic (1 A4 page) and executive summary (500 words), **due Thursday 29<sup>TH</sup> October.**
- 70% Individual report (2,500 words), **due Thursday 10<sup>th</sup> December**

**IMPORTANT:** You must write both assessments on your assigned case company, which corresponds to the workshop tutor you have been allocated:

---

### ASSESSMENT 1: GROUP INFOGRAPHIC AND EXECUTIVE SUMMARY

---

- You have been assigned a group of 4 based on your MS teams workshop grouping. Therefore it is essential that you attend the MS teams workshop you are registered for in order to become part of a group.
- **Between Monday 11<sup>th</sup> & Friday 16<sup>th</sup> October**, groups should be finalised and the 'Group Registration Form' filled in (see Moodle) and submitted by one of your group by email to the undergraduate office.
- **Group work is where you learn managerial skills.** This is integral to your education. If you experience frustration with coordinating group meetings, or with the way others in your group participate (or fail to participate!), consider it an opportunity to develop your interpersonal skills. Every group will experience some problems during the term due to miscommunication and the life circumstances of group members. *It is expected that you will address these situations professionally.* Remember, successful managers are those who bring the best out of those around them, who help others succeed, who take responsibility for failure and share credit for success.

Each group is required to complete the following assignment:

*You have been hired as consultants for your case company.*

*You should choose one megatrend relating to your company's external context.*

*You are requested to create a **one** A4 page infographic, accompanied by a 500 word executive summary (on a separate page), outlining the megatrend and the opportunities and constraints it poses for your case company's responsible management practices.*

---

### ASSESSMENT 2: INDIVIDUAL REPORT

---

You are requested to write a consultancy report of 2500 words. You should identify ONE major responsible management challenge your case company currently faces, and analyse it in the context of the company's existing responsible management practices. You should then make recommendations for how the company should address the challenge through a combination of TWO or THREE different business functions covered in the module (e.g. business models, strategy, communications, HRM, and supply chains). Your analysis and recommendations should be supported by research, and you should clearly indicate how the functions will work together to solve the challenge identified.

**Check out the 'Assessment Information' box on Moodle** for Q&A documents on each assignment, copies of the marking criteria and rubrics we use to grade your assignments. Get familiar with these BEFORE posting questions in the Moodle forum. Thanks!

---

## RESOURCES AND READING LIST

---

**Please see within each block on Moodle for links to essential reading, watching and listening each week**

Journals:

- *Business and Society*
- *Business Strategy and the Environment*
- *Journal of Business Ethics*
- *Organization & Environment*
- *Social and Environmental Accountability Journal*
- *Stanford Social Innovation Review*
- *Business Ethics: A European Review*
- *Harvard Business Review*
