WELCOME TO FAMILY FOUNDATION GIVING TRENDS 2015

Latest financial data shows continued power of foundation model

This is the seventh edition of *Family Foundation Giving Trends*. It provides an update on annual charitable income and spending by the UK's top 100 family foundations in 2013/2014, with details on the next 50 foundations. This focus on family foundations not only provides a benchmark to the personal philanthropic giving of the UK's wealthiest individual and family donors, past and present, but also demonstrates the enduring appeal and value of the foundation as a vehicle for their giving.

A new analysis in this year's report also shows that the vast majority of the 150 foundations included here have living founders and family trustees on their governing boards, an indicator to the level of active family involvement in giving through foundations. The report also provides ongoing evidence of major new giving through foundations. Examples include the very recent, such as the Bet365 Foundation, as well as those set up within the last decade and building up resources, such as the Moondance Foundation which received an additional £31.5 million gift in 2013.

Although no statistics about new foundations are published in the UK, a search of the Charity Commission Register reveals an ongoing stream of registrations of new family foundations, some of which are large enough to make it into our tables like the Liz and Terry Bramall Foundation (2007), the Taylor Family Foundation (2007), the Sofronie Foundation (2007) and the Kusuma Trust UK (2008).

The assets of family foundations in 2013/14 grew by a real 14%, while grant-making grew by a real 4.2%. Meanwhile, new voluntary giving into foundations from family/family business donations and legacies grew by a real 20% in 2013/14, a rate that surpassed those of foundations generally. This report complements *Giving Trends Top 300 Foundations 2015*,¹ published in September, which provides the broad picture of the foundation sector. Its findings show that, as across foundations generally, family foundation finances have become more buoyant after the post-recession period of uncertainty and fluctuation.

FOUNDERS, FAMILIES AND FOUNDATIONS

01-02

A focus on family foundations provides a valuable benchmark of the personal philanthropic giving by some of the UK's wealthiest individual and family donors, past and present

WHAT IS A FAMILY FOUNDATION?

'Family foundation' or 'family trust' are not technical terms, as all charities in the UK have the same charitable form. These are convenience labels used in this statistical research to refer to independent charitable foundations, funded principally by the personal gift of an individual donor, family business or family member(s). Founders or their families and descendants often hold positions on the governing board, and although it is not a defining criterion the issue is still debated within US research. Some maintain that the existence of founders and families on the board is a key distinguishing criterion in terms of their operations. For the first time in the annual updates on family foundation giving, this year's edition has reviewed the involvement of founder donors and other family members at board level in UK family foundations. We found an unexpectedly high number of trustees who were either individual/family donors, or their descendants and other family members.

73% of top family foundations have a family trustee. In a large majority of the top 100 family foundations (73%), founder donors and other family members are trustees.

A minimum of 180 family trustees are involved. This figure is probably an underestimate because the research was carried out through a name search of published data, but it was not possible to track all names. The research focussed on the top 100, but found many other smaller family foundations also have founder donor and family trustees.

Giving of £678 million. Almost three-quarters of family foundation giving (excluding the Wellcome Trust), is managed by boards with founder donor and family trustees (74%).

Assets of £19.3 billion. Almost four-fifths of family foundation assets (excluding the Wellcome Trust), are held by boards with donor and family trustees (78%).

Numbers of family trustees ranged from 1 to 9 with the most common pattern being foundations with 1 or 2 donor and/or family trustees.

RELATIONSHIPS

Trustees included individual and family donors, their spouses, civil partners, children, grand-children, in-laws, aunts, uncles, nephews, nieces, cousins and others as well as more distant descendants. Where donors or families are not directly represented on the governing board, they are often consulted or have final sign-off on trustee appointment. This new data reveals the high engagement of many wealthy individuals and their families, with many attaching great importance to family traditions of involvement in philanthropy through the foundation, or taking a strong direct hand in strategy. These traditions continue to be influential even where there are no living founder or family trustees. These findings should also serve as a reminder to government, policy-makers, fundraisers, regulators and others that much major philanthropy in the UK is a very personal and family affair.

This new data reveals the high engagement of many wealthy individuals and their families

We found an unexpectedly high number of trustees who were family donors or their descendants and other family members

BARROW CADBURY TRUST

'All of the trustees were direct descendants of Barrow and Geraldine Cadbury, until two non-family members were appointed in 2009. Family trustees are recruited through the family and efforts are made to establish familiarity with the work of the trust among younger family members at an early age'.²

JOHN ELLERMAN FOUNDATION

'Over the years the Foundation has continued to uphold the aims, interests and values of its main benefactor, while adapting to the changing needs of the modern charitable world'.³

NUMBER OF FAMILY FOUNDATIONS BY NUMBER OF FAMILY TRUSTEES

A LAWYER'S VIEW ...

A family foundation is in many ways just like any other UK charity; its assets are irrevocably committed to charitable purposes for the public benefit and it must operate according to the same rules and regulations as non-family charities.

Yet we miss a chance to better understand this important phenomenon if we overlook the difference. One key element is the involvement of family members in the operation of the foundation.

There are many approaches: family members may comprise a majority (sometimes even the entire) board or they may sit on an advisory council which informs an independent board,

or be given particular rights or offices. Executive functions might be carried out by employed family members, and involvement of the family business in grant-making or administration is not uncommon. Two important issues that every family foundation should of course be alive to are conflicts of interest and issues of private benefit.

How do families decide on their approach? In many cases foundation governance is shaped by circumstances as they develop over time. For example, the founder's vision may have been for a family board but vacancies arising on death or divorce cannot be filled by suitable and willing family members. Some ad hoc governance arrangements may work beautifully – co-operation on the foundation board may facilitate

relationships in all types of family, but large families with several 'branches' may particularly benefit from board representation in the foundation.

But ideally a family's philanthropy forms a part of the wider family vision, and foundation governance reflects that fact. A family that is planning for generational wealth transfer or business succession will want to consider the foundation board in their planning. One option might be the induction of the next generation onto the board alongside trustees with particular financial, legal or other expertise from which they can learn wider life and business skills.

Alana Petraske, Special Counsel in the Charities and Philanthropy Team, Withers LLP

COMPILING THE DATA

The measurement of philanthropic giving in the UK involves stitching together data gathered from different sources, through different methodologies, at different times. This creates a fabric with some holes. Key figures in this report are drawn from:

- financial figures in annual reports and accounts
- foundations' websites
- a search of literature, including press reports
- other sources including tax statistics, estates data, general public surveys, 'high net worth' surveys, and studies of particular themes.

Foundations' accounts are published at different times of the year. This, coupled with the research time-lag, means that the data used to track annual trends relates to financial or calendar years 2011, 2012, 2013, 2014.

£MILLION

A CHANGING LANDSCAPE

05-06

The family foundation landscape can shift rapidly for a variety of reasons

The foundation landscape is a dynamic and changing one. Each year sees some dramatic changes of position in the foundation tables, as foundations make major new commitments, adopt new spending strategies, receive significant

new donations which extend their grant-making power or speed up a policy of spending out. This year's report reveals just how high the level of active family involvement in foundations is (see page 01-02): movements in the family

foundation tables are often related to significant stages or anniversaries in the individual or family founders' lives, in which foundation philanthropy is deeply embedded.

THE LEMPRIERE PRINGLE TRUST

moved up again from number 49 to number 8 in this year's table. It received a major new donation from its founder, and made grants of £20 million to its Auckland Castle project aimed at the regeneration of Bishop Auckland and surrounding area, and the acquisition of a collection of 17th Century religious paintings by the Spanish artist Francisco Zurbaran.

THE ATLANTIC CHARITABLE TRUST

moved from 38 to 16 in the table, as it made some major commitments to its priority areas of children's and public health, particularly in Cuba, as part of its spending out policy.

THE NUFFIELD FOUNDATION

went up from 36 to 11 after giving a record £23.7 million in 2013, a major tranche of which was for the Q-Step programme to promote quantitative social science training for undergraduates. Partnership funding from the Economic and Social Research Council and the Higher Education Funding Council for England was received by the Foundation in a major example of charity/public sector collaboration over a key national initiative.

THE MAURICE WOHL FOUNDATION

moved up significantly from 59 to 24, increasing its grant spending by over £5 million to £8.8 million. This was to mark 50 years since the founder Maurice Wohl made his initial grant, and to honour the legacy of Maurice and Vivienne Wohl.

THE PETER HARRISON FOUNDATION

also made a dramatic leap from 97 to 23, increasing its grant spending by £8 million. This was made possible after the sale of commercial property assets enabled the completely independent Peter Harrison Heritage Foundation. (This foundation does not accept applications for grants.)

SIR JULES THORN CHARITABLE TRUST

made a dramatic leap from 91 to 19 as it spent almost £10 million extra to celebrate the 50th Anniversary of the Trust, doubling the amount it originally intended to spend after receiving very high quality funding bids.

THE DE HAAN CHARITABLE TRUST

went down to 26 from 17 after major new gifts from the founder and spending commitments in the previous two years, many reflecting the founder's commitment to Folkestone and East Kent.

THE PAUL HAMLYN FOUNDATION

spent £7.3 million less, moving from 8 to 14 after historically high spending in 2013 to mark the Foundation's 25th Anniversary.

NEW ENTRANTS

ARCADIA

Arcadia, Peter Baldwin and Lisbet Rausing's trust, established under the Charities Aid Foundation, has made its accounts available to us this year and is a welcome and significant new entrant to the table at number 12, with charitable giving of £22.5m.

ENVIRONMENT/
CULTURAL
HERITAGE

THE DEREK BUTLER TRUST

The Derek Butler Trust has entered the table at 39 with giving of almost £6 million, after stepping up its spending from both capital and income in 2013 as part of the process of winding up the trust. It was empowered to accumulate income for 21 years from the founder's death in 1998.

MUSIC
HEALTH

THE MARTIN AND JUDITH AINSCOUGH CHARITY TRUST

The Martin and Judith Ainscough Charity Trust came into the table at number 83 after a large gift of £2 million in 2013 to a youth centre in Wigan, the area in which the founders have worked and lived.

LOCAL YOUTH
SERVICES

THE SACKLER TRUST

The Sackler Trust has taken position 51 in the table with major new giving in 2013 totalling over £4 million, after major donations into the trust to build its funds since it was set up in 2009.

ARTS/CULTURE
EDUCATION

DUNARD FUND

The Dunard Fund, funded by a family business, and registered as a charity in both Scotland and England, came into the table at 98 after a recent major donation into the fund enabled giving of almost £2 million in 2013.

MUSIC
VISUAL ARTS
ARCHITECTURE

BET365 FOUNDATION

The Bet365 Foundation is a major new trust which came in at 121 with giving of £1.5 million in 2014, an amount likely to grow in the future since the foundation was endowed with a major founder gift of £105.5 million in 2014.

HEALTH
EDUCATION

THE BECHT FAMILY CHARITABLE TRUST

The Becht Family Charitable Trust is a new entrant to the tables at 114 with giving of £1.6 million in 2013 funded through its significant investment income.

INTERNATIONAL
DEVELOPMENT

CHARITABLE SPENDING

07-08

The underlying trend for this year's Top 100 indicates strong growth

Several family foundations have their own programmes in addition to making grants to other organisations and individuals. In 2014 13% of their charitable expenditure was on operating programmes compared with 9.6% for the Top 300 independent charitable foundations, and 7% for corporate foundations.⁵

Total charitable spending in 2013/14 was £1.6 billion, 83% of total expenditure.

Total charitable spending in 2013/14 was £1.6 billion

GRANT-MAKING THE TOP 100 BENCHMARK

- Increased grant-making by the top 100 family foundations in 2013/14 enabled them to maintain a combined grants value of £1.4 billion⁶. This figure showed that total grants not only kept pace with inflation, but also compensated for a £50 million decrease in grant-making by Wellcome, as well as large drops in Gatsby's spending since 2012 (when grants totalled £146 million), after major earlier commitments from both.
- Wellcome represents 36% of the total grant-making of the Top 100. If the skewing effect of Wellcome is excluded from this year's Top 100, the underlying trend for family foundation giving in 2013/14 is an impressive 15.2% increase.
- The overall underlying trend for this year's Top 100 grant-making (including the Wellcome Trust), indicates this strong growth with a real 4.2% annual increase in giving in 2013/14.

- Non-grant charitable spending on family foundations' own direct programmes was £209 million, an example includes the spending of the Ernest Cook Trust on educational programmes around environment, agriculture, woodlands etc. based on its estates.

THE NEXT 50

An additional table of the next 50 foundations was created to capture some of the family foundation sector's new foundations or those at the stage of growing their endowment. These add £68 million to grant-making, and £4 million to other charitable expenditure. The large endowment gifted during the year to the bet365 Foundation illustrates these dynamics, as it increased the overall voluntary income of this group by 150%.

Increased grant-making by the top 100 family foundations led to a combined grants value of £1.4 billion

Investment management costs increased markedly, partly as a result of the way costs must be shown in annual accounts and partly because of growth in funds under management in 2014. Notably, the Wellcome Trust's assets grew by £1.7 billion.

Support costs often average at around 5% of total spending, but because they

are not always reported separately this figure is likely to be an underestimate. Largest increases were in the Wellcome Trust and the Children's Investment Fund Foundation, in each case related to programme delivery. The Rufford Foundation's costs were bigger after the 2013 merger of the Rufford Small Grants Foundation and the Rufford Foundation.

TRENDS IN FAMILY FOUNDATION CHARITABLE SPENDING

09-10

INCOME

11-12

Fluctuations in the markets and in the number of new donations they receive have a direct impact on the resources available to family foundations

The total income of this year's top 100 family foundations grew overall by 4.3% to £1.4 billion. Family foundations derive income in two main ways, both of which saw overall growth in 2013/14:

- Investments and endowments**
 Returns on investments constitute the main source of income to family foundations at 65%, unlike corporate foundations which depend heavily on annual giving from companies. Returns on investment comprise annual share income and increases in the total value of capital – capital appreciation.

- Voluntary private donations and legacies**
 Over one-quarter of income to family foundations (29%) is derived from voluntary gifts from individuals, family businesses and foundation gifts and legacies.

The fluctuations in the market, and the many individual life and career events which influence major donors' voluntary giving together generate constant change in the overall resources of family foundations.

INVESTMENT INCOME

The growth in total income this year was particularly fed by a recovery in investment returns. For example income from investments surged by a real 11% in annual value. The annual income from investments of the Wellcome Trust saw an increase of £44 million in 2014, followed by that of the Children's Investment Fund Foundation at £16 million.

In addition to these income funds, capital appreciation is also used to fund grant-making.

VOLUNTARY INCOME

Voluntary income represents well over one-quarter of the income of family foundations (29%), which was slightly up on last year's 27%. It also saw robust growth of a real 20% in 2013/14.

Four family foundations received voluntary income which was £20 million or more higher than the previous year, including the Dr Mortimer and Theresa Sackler Foundation, the Lempriere Pringle Trust, the Zochonis Charitable Trust and the Gatsby Charitable Foundation.

Income has picked up well after flat-lining around 2012, and this is directly reflected in the increase in grant-making in 2013/14.

Our statistics have shown⁹ that spending trends tend to follow those for income and assets but with a one-year time-lag. This means that a 14% real growth in income bodes well for levels of spending next year. This year's spending also grew, but at a lower level than income, at 6% overall.

It is worth highlighting that the apparent drop in grant-making in 2012/13 is slightly misleading, as it can largely be explained by the spending of one grant-maker - Gatsby's grants fell to £16 million after a major grants investment of £145m in 2012.

KEY INCOME FIGURES

INCOME	2012/13 (EMILLION)	2013/2014 (EMILLION)	ANNUAL ADJUSTED CHANGE (%)
VOLUNTARY	301.9	362.2	20.0
INVESTMENT	748.2	827.1	10.5
TOTAL INCOME*	1,111.2	1,264.0	13.8

*This figure includes a small amount from trading, charitable activities etc which is not shown separately in the table.

TRENDS IN INCOME AND GRANT-MAKING

ASSETS

13-14

Family foundation assets rose to their highest point since the financial crash

After some dramatic falls post-recession, annual growth rates in the real value of family foundations' net assets began a dramatic upturn between 2011/12 and 2012/13, which has continued in 2013/14, with growth rates and value reaching their highest points since the 2008 crash.⁹

The annual adjusted growth rate was 14%. At £41.6 billion, the combined net assets of the Top 100 family foundations are now worth almost £4 billion more in real terms than in 2006/07. (£37.7 billion adjusted). This includes a landmark rise of £1.7 billion in 2014 in Wellcome's funds.

Family foundations hold 80% of the net assets of the Top 300 Foundations

TOTAL	36,897.5	43,197.3	14.6
PROGRAMME RELATED INVESTMENTS	27.8	31.5	13.2

Family foundations hold a large majority of Top 300 foundation investments, at a total of £43 billion in 2013/14 they represent 83%. Overall their investments saw a substantial real growth of almost 15%, with a particularly striking rise of 41% in investment property value.

This was due in large part to growth in the value of the Wellcome Trust's

property portfolio, but others who saw substantial rises include the Leverhulme Trust and the Thompson Family Charitable Trust.

Programme-related investments (PRI), sometimes also called social investments, are those made for a social return which is related to the achievement of the foundation's mission, as well as a financial return.

They may be made at a discounted rate, or over the longer term.

Previous foundation research¹⁰ indicated that by 2013 foundations had set aside around £100 million for social investment. Family foundation PRI represents 78% of total PRI for the Top 300 in 2013/14, closely reflecting its share of all investments.

UK/US

15-16

A comparison of two traditions of family giving through foundations...

Family foundations represent 45% of all foundations by number in the US, and their giving continues to grow faster than that of other foundations.^{11,12}

We do not have data on numbers in the UK, but family foundation giving represents 56% of all foundation giving, compared with 38% in the US. Differences between the profiles of UK and US foundation giving are:

- Family foundations represent the largest share in the UK, compared with independent and other (eg operating) foundations in the US
- US community foundations, which have been established since 1914, contribute a much larger share than in the UK where they emerged in 1975.¹³

The majority of foundation giving in the UK comes from family foundations compared with 38% in the US

- Only data for 2009/2010 is currently available on US family foundations, with an estimate for growth in giving in 2013. UK figures should be treated with caution, and as estimates because they draw on existing published surveys, in which there are some discontinuities. Both the UK and US annual estimates contain accounts with varying year-ends.
- Foundation Center *Key Facts and Figures 2014 Edition*; Foundation Center Key Facts on *Family Foundations 2010*.

GLOSSARY

Accounting year The twelve-month period used by foundations for their annual financial reporting (calendar year, government fiscal year, or other).

Assets Total value of financial and other non-financial assets after deducting liabilities etc, as reported in annual accounts.

Charitable Spending Total value of all types of direct spending on charitable mission, including grant-making, but excluding administrative and other indirect overheads, as recorded in annual accounts.

Foundations Although not technical terms, 'foundation' or 'trust' are increasingly and interchangeably used for charities with an independent board and private, independent and sustainable funding, often an endowment, and whose main activity is to give grants to other charities, causes or individuals.

Foundation Types All UK charitable grant-making foundations have the same charitable status, but it is sometimes useful to define and label them according to their principal source of funding. 'Convenience' labels and types of function in this report are:

- **Community:** foundations which make grants whose funds are raised through local giving, sometimes for an endowment, and dedicated to distribution in a particular locality.
- **Corporate:** foundations which make grants funded by endowments or annual gifts from private companies.
- **Family/Family Business:** foundations which make grants funded by individual major donors, private family donors or a family business.

Giving Total value of annual charitable grants made as recorded in annual accounts.

GDP Gross Domestic Product, a measure of the value of total output from the UK's economy.

Income Total amount of funds from all sources recorded in accounts as the annual income for the year.

Voluntary Income The total income derived from private donated sources such as gifts, legacies, corporate donations, grants from other trusts, and excluding government/quasi-government grants.

AUTHORS

Cathy Pharoah, Visiting Professor of Charity Funding, CGAP, Cass Business School

Keiran Goddard, Head of Communications, ACF

Richard Jenkins, Head of Policy, ACF

ORGANISATIONS

The Association of Charitable Foundations (ACF) is the membership organisation for foundations and grant-making charities in the UK.
acf.org.uk

The Centre for Charitable Giving and Philanthropy (CGAP) at Cass Business School is the first UK academic centre dedicated to research on charitable giving and philanthropy.
cass.city.ac.uk/research-and-faculty-centres/cgap

Pears Foundation is a British family foundation rooted in Jewish values. Its work is concerned with positive identity and citizenship, including promoting philanthropy.

ACKNOWLEDGEMENTS

Special thanks to **Trevor Pears** CMG, Executive Chair, Pears Foundation.

We are particularly grateful to Margo Willison, Centre Manager, CGAP, for her substantial research assistance.

Thanks go to the following individuals for their time and insight in contributing to our reference panel:

Amelia Fitzalan Howard, Director, The Rayne Foundation

Bridget McGing, Deputy Director, Pears Foundation

Anthony Tomei CBE, Trustee, The Bell Foundation

Thanks also to **Katherine Duerden**, Membership Relationship Manager, ACF, and **Jade Glanfield**, Communications Officer, ACF, for their contributions to the project.
